

Line ending chaos ... \n vs \r\n vs \r	circular references	please enable macros	broken formula	blank rows
PDF tables	non-standard country names	split cells	Metric? Imperial? Ask the dust ...	US zip codes 12345 or 90210
long fieldnames are long	metadata at end of spreadsheet	FREE	assumed knowledge	Data that "must exist" does not, in fact, exist
metadata mixed with data	starred numbers*	Spreadsheet has exactly 65,536 rows	duplicate rows	Duplicate rows
out of date docs	Yo, I hear you like metadata mixed with your data	Data is "helpfully" pre-aggregated	Blank/null values aren't explained	Location of 0°N 0°E, ie "Null Island"
